Our **Mattresses**

Comfort, Support, Relieves pressure

Imperial Bamboo mattresses are made with the latest foam mattresses technology. Adapted to conform to the human anatomy, they absorb motion and relieve pressure in the right places.

Many years of research has led to the development of our mattress, each providing a particular advantage for your unique situation and health requirements.

A personalized solution for sleeping, you will find mattresses with a firmer feel, a softer feel, designed for ease of movement or for faster response. Micro coils that feel amazing as individual coils react to your movement and the bed takes the shape of your body. Extra soft materials that cradle you while you are being supported by unique layers beneath that offer comfort and relieve pressure.

Revolutionary technology, regardless of your sleeping position gives comfort, support, relieves pressure and most of all gives you that good night's sleep so you always wake up feeling refreshed with all the parts of your body rejuvenated.

About Us

Bamboo is evidently the most robust material that can be very helpful in making houses and furniture. What is more amazing about bamboo is that it has become extremely popular in the textile industry as well. Now along with your furniture you can also have pillows, mattresses, beddings, and mattress toppers made out of bamboo as well.

Bamboo does not only provide durability, but it makes sure that you are provided with ultimate comfort. **Imperial Bamboo utilise the Bamboo extract to manufacture their high-quality products that you can use in your home and garden.** We produce the best quality pillows, mattresses, mattress toppers, and beddings in various sizes. The best part about our products is that we do not use an additional deodoriser to provide a scented perk in any of our items. Since we utilise bamboo, our products are naturally scented and do not store any odour that might irritate you later on.

Another important feature of our bamboo products is that they are antibacterial and will also help in preventing any allergies. **Our products are easily washable, and you can also have them cleaned in your washing machines** without even damaging the bamboo fabric and filling in the products.

Features
and advantage
of our products

Motion absorption

Our mattress allow you to comfortably sleep even with the most restless partner without disturbing each other with super motion absorption technology.

Personalized body support

The materials used for making our mattress have been tested for comfort, flexibility, and durability. They compress and take the form of your shape, helping to relieve your body of any discomfort regardless of your sleeping position.

Designed long-lasting performance

The longevity of our mattresses is designed to last for a years. Conceptualised with the most high-tech and durable materials.

Orthopaedic Mattress

Whether you often suffer from back pain, or occasionally have muscle strains. You will find the soothing comfort with our mattress help keep your spine and neck aligned.

What make our mattress so special

Technology for a good night's sleep

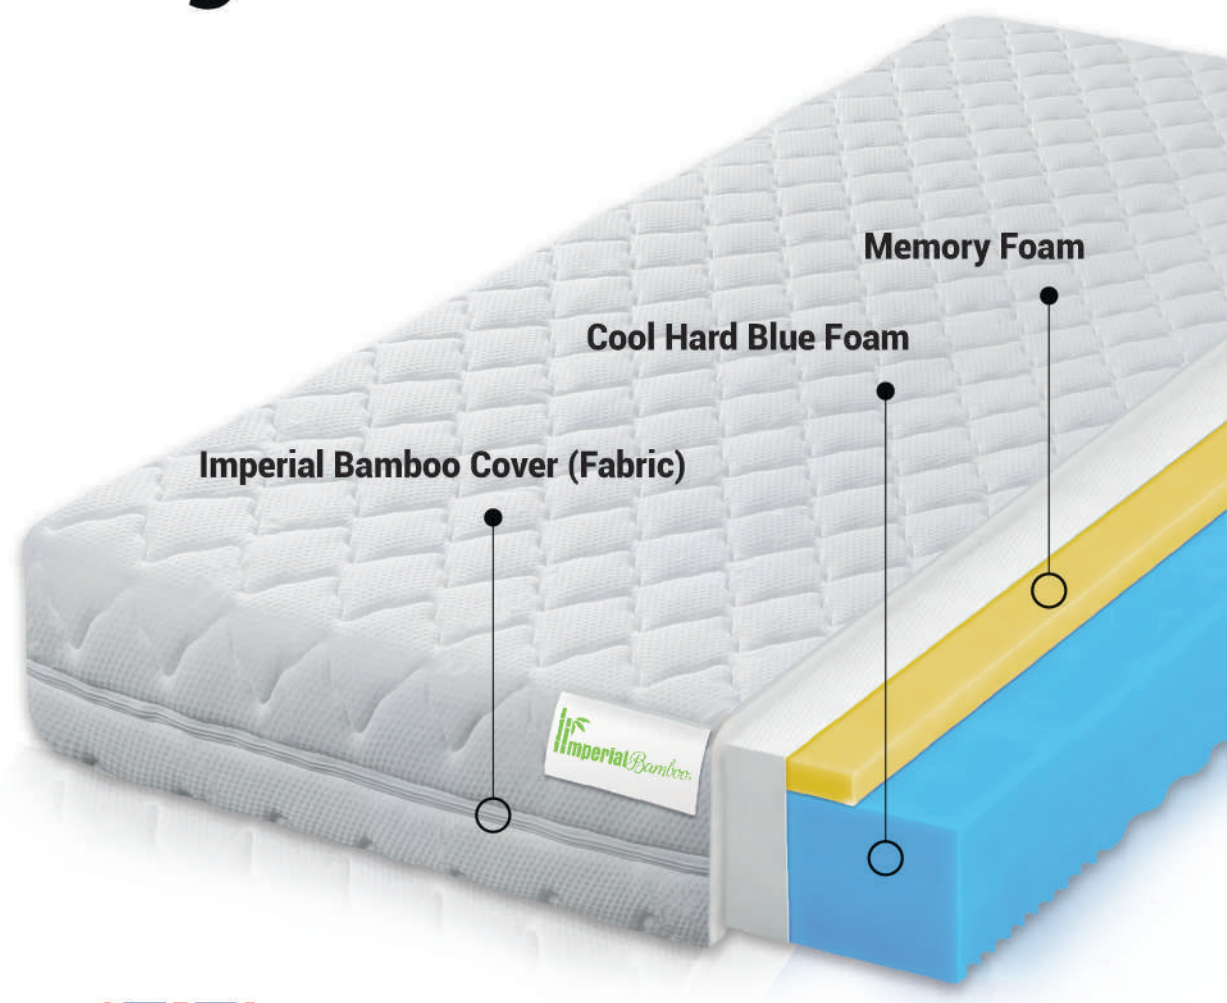

Memory Foam

Memory foam was first designed in the 1960's for Nasa plane seats.

The average memory foam mattress literally has millions of tiny holes and air escapes from these as the foam moulds to itself around the body.

This action is activated by pressure and body heat, and results in a foam mattress that offer total independent support without pressure points.

Memory foam is hypo-allergenic and dust mite resistant creating a healthier sleeping environment.

Cool Hard Blue Foam

Cool Hard Blue Foam consists of an advanced P.U based foam. It is one of the latest developments in foam. It has the same pressure relieving benefits and body moulding properties as memory foam but without any heat, and because it doesn't retain heat, it returns to its original shape much quicker. Hard Blue foam is also high density foam, but is constructed in a different way using larger bubbles. When pressure is applied to these bubble they act in a similar way to water in a balloon-the air does not escape, and instead is displaced 'sideways'. Once pressure is relieved, the bubbles spring back into shape and the mattress retains its shape.

It's for this reason that the Blue foam mattress is as popular as an orthopaedic mattresses it offers a firm but comfortable mattresses option.

Blue foam also been found to be one of the best supportive layers / base foams to be used in the manufacture of many foam mattresses.

More Comfort Feel

Imperial Bamboo Cover (Fabric Non Washble)

Our fabric is unique and also includes cover that is soft and cool fresh adding to a wonderful sleeping experience.

Imperial Bamboo fabric including this revolutionary fabric in their range to help you sleep more comfortable. It works by removing moisture away from your body allowing for more evaporation to occur which leads to a cooling effect on the fabric. Cooltouch controls humidity and dries quicker, you stay fresher whilst asleep reducing the change of night sweats and broken sleep.

Can mitigate aching knees, arthritic and cruciate ligament trouble. Provides excellent support after operations.

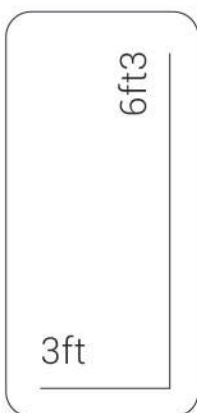

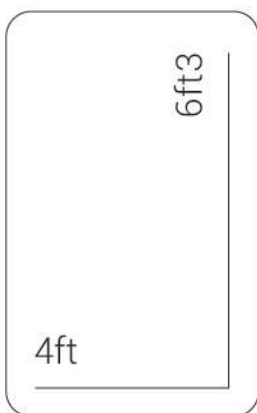

HOW TO UNPACK YOUR MATTRESS OR TOPPER

UK Mattresses Sizes

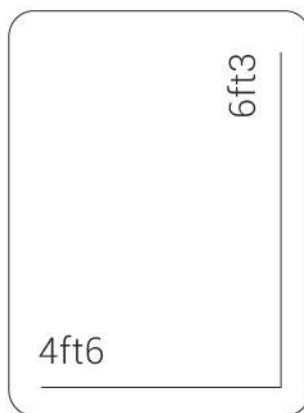

SINGLE SIZE

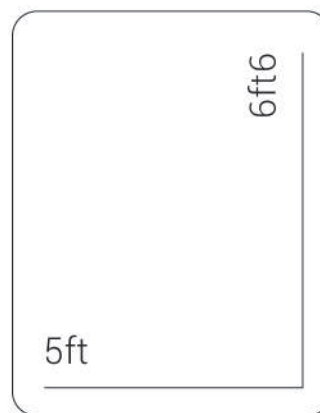

SMALL DOUBLE

DOUBLE

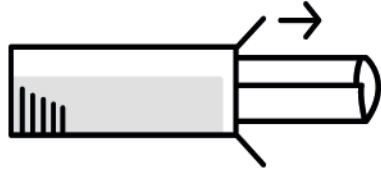

KING SIZE

SUPER KING

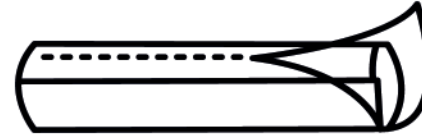

* All mattresses size arrive **by ft not cm**

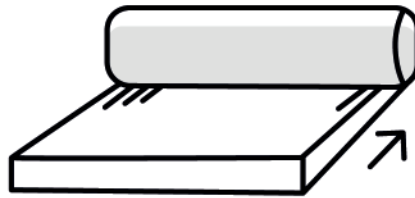

STEP 1

Lay the box on its side in your bedroom. Remove bagged mattress.

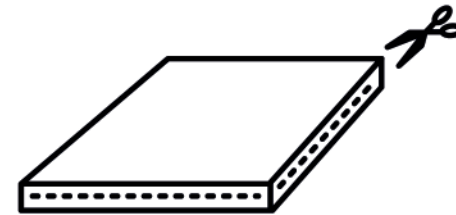

STEP 2

Using force, tear bag along the stitch line. **DO NOT USE** knife or scissors, as this may result in damage to your mattress.

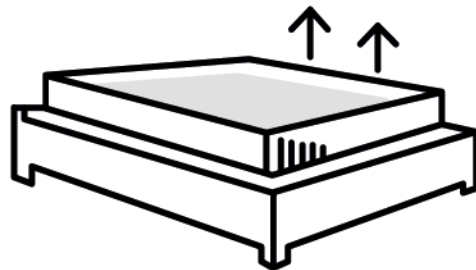

STEP 3

Roll out the compressed mattress on to a clean, flat surface, zipper side down.

STEP 4

Carefully cut open the **CLEAR** plastic bag along the edges. The mattress instantly begins to decompress. Remove the bag.

STEP 5

Allow bed to fully recover before adding bed linens. Use on any clean surface such as a box spring, platform bed or foundation.
